

CASE STUDY

Ref: 9204

Lingwood

Food Processing Machinery

The Problem :-

You have identified that major savings can be made, through the automation of your manual production and assembly lines, by reducing labour and product giveaway, however, finance for such projects is difficult to raise and in many cases simply unavailable.

In the current economic climate we see time and again that good investment projects are dropped because the money cannot be approved. This is particularly frustrating when a project may have a very short pay-back time.

The Solution :- PAY AS YOU WEIGH....from Bilwinco

Now it is possible to install a state of the art weighing and filling system, from Danish multihead weigher specialist Bilwinco, in a cost efficient and flexible way. The new "Pay As You Weigh" offer from Bilwinco keep up front costs to a minimum and enables the customer to generate profits from day one.

BILWINCO supplies multihead weighers and complete fully automated weighing, filling and packaging systems customized to individual needs.

At the core of every BILWINCO system is their highly specialized multihead weigher, which is developed and produced by BILWINCO.

From transport, feeding, weighing and portioning to filling, positioning, packing, mobility, hygiene and data collection/traceability BILWINCO have the solution.

The Benefits :-

- No investment, operational leasing
- Leasing expenses are recorded as a cost in the P&L accounts
- The balance sheet is not affected
- Profit from day one. The profit made per weighing is greater than that being paid out
- Leasing expenses are 100% tax deductible
- No maintenance costs—A full BILWINCO service contract is included
- Short binding period is all that's required making the option adaptable to any change in circumstances
