

# Fabrication in-house

A food processing equipment supplier has created a fabrication department at its Stowmarket headquarters.

Lingwood Food Services, based on the Tomo Industrial Estate, has worked for more than a decade with local fabrication expert Mick Daley of Mistan Fabrications and has brought the operation into its workshops.

"It has made absolute sense to bring the operation into the Lingwood workshops to maximise synergies between the two companies", said Lingwood financial director Mike Last.

Lingwood provides a range of equipment from bespoke processing lines to standard solutions.
