

Destemmer

Picking grapes, dates and cherry tomatoes with the destemmer surpasses manual processing. The machine is unique because, like no other comparable machine, it can pick the fruit from the vine with a rotating movement. Which is just how it would happen if picked by hand. The point where the stem meets the fruit thus remains intact, improving shelf life.

ROTATING MOVEMENT PREVENTS INADVERTANT DAMAGE TO THE SKIN

The bunches are fed into the top of the machine. The Destemmer rotates the fruit carefully, releasing them individually from the stem. The soft 'friction pads' in the machine ensure that the fruit cannot be bruised. Once the pieces of fruit have been picked from the stem, they roll along the conveyor belt.

CAPACITY AND AVAILABILITY

Depending on the quality and variety of grape, the Destemmer can process up to around 500 kg per hour. Apart from grapes, the Grape Destemmer can also pick dates and cherry tomatoes. Should you require more information on this, please contact us.

Features of the Destemmer

- Fruit makes rotating movement to prevent damage at the stem
- Grape-picking capacity: up to 500 kg/hour
- Machine dimensions: 1635 x 1117 x 1800 mm (L x W x H)
- Conveyor belt dimensions: 4000 x 400 x 900 mm (L x W x H)
- Supplied as standard with blow-dry installation

Features of all our fruit-processing machines

- Careful treatment and processing improves the shelf life
- High processing capacity
- Maximum yield per processed product
- Equals or betters manual processing
- Visually attractive end product
- Easy to clean and to service
- Meet European guidelines for the food-processing industry in relation to hygiene and safety

Features of all ZTI smart machines

- Smart innovations that are distinguished by their simplicity
- Simple and safe to operate
- Equipped with the latest technology
- Optimum balance between 'mechanics' and 'electronics'
- Attractive recovery of investment time
