

# Belt Cutter GS 20

Multi purpose lettuce and vegetable belt cutter designed and constructed for the food processing industry

### GS 20 Belt Cutter

# Versatility and capacity in one machine – Cutting machine for lettuce, herbs, vegetables and fruit up to 4 tons per hour

The GS 20 belt cutting machine is equipped with a conveyor belt 250 mm wide with a product down-holder to apply proper pressure for product control. This key feature holds and controls the product until point of cutting. Individually definable programs can be stored and selected by the simple use of control buttons and features digital in-motion cutting size adjustment from 1 to 50 mm using a knife with 3 blades. The GS 20 feeding belt has been designed to convey whole heads of lettuce or cabbage. The easy handling joins our series of all established KRONEN GS belt cutting machines. The knife cover allows for an optimized product outfeed and thus a gentle product handling. To ensure consistent cutting quality, the GS 20 includes as little wear parts as possible. Indicator lights indicate the status of the safety sensors. The

locking system combined with the belt cover ensures the safety in the area of the knife. As with all KRONEN machines, its excellent hygiene qualities are a major advantage: Inclined surfaces, stainless steel shaft seals and the elimination of screws in the cutting chamber door area, a seamless knife edge, etc. contribute to the excellent performance of the GS 20 belt cutting machine. The solid industrial machine is completely made of stainless steel. It has been conceived caring specially about simple maintenance, easy and efficient cleaning and is, therefore, ideally suited for professional applications.

### GS 20 Standard Highlights

### **Exceptional cutting quality**

Products are transported smoothly and held until point of cutting thus assuring a perfect cutting quality. High-quality materials ensure a long service life of the components and enable quick, easy and effective replacement.

### Operation

The user-friendly electronic control panel allows digital in-motion cutting size adjustments. 100 individual, user-definable settings for the parameters knife / belt speed can be stored for a great variety of products.

#### Cleaning and maintenance

As with all KRONEN machines, its excellent hygiene qualities are a major advantage: Inclined surfaces, stainless steel shaft seals and the elimination of screws in the cutting chamber door area, a seamless knife edge, etc. contribute to the improved performance of the GS 20 belt cutting machine. All machine parts as knives, guides, belts, belt tensioners etc. are quickly removable without any tools for cleaning. The solid industrial machine is completely made of stainless steel AISI 304. The basic principles for all KRONEN machines are:

- easy maintenance
- easy and efficient cleaning
- soft product guidance
- low operating expenses

#### FDA approved

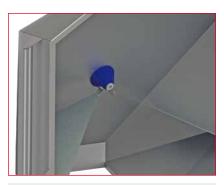

All parts that are in contact with food are made of stainless steel or FDA approved plastic, i.e. all of the machine is FDA approved. FDA approval is documented in manual supplied with machine.

### GS 20 Options & Accessories

### Mobile version

The GS20 belt cutter is available as mobile version (4 castors) for optimal application at different locations.

### Spraying nozzles for automatic cleaning

For most convenient and easy cleaning, the GS 20 belt cutter can be equipped with spraying nozzles (placed in the cutting chamber). This option is available with or without timer (water control is programmed or water control can be regulated by tap).

### **Cutting disc holder**

This mobile cutting disc holder (4 castors) guarantees a safe storage of your knife discs as well as a quick access.

#### Trimming & sorting table

We offer convenient and ergonomic trimming & sorting tables for 1 up to 16 and even more persons which are perfectly suited for adaption directly to the infeed belt of the GS 20 belt cutter. These tables are equipped with stepless belt speed adjustment, product guides, removable cutting boards, waste chute, etc.

Various options and accessories are available such as hopper extensions, waste belts, crate supports, etc. – allowing improved yield and considerable increase in productivity!

#### Conveyor belt

We offer various conveying belt systems for the efficient and smooth transport of your food products. Our product portfolio includes solutions for any given conveying demands from simple standard belt conveyors to complete conveying systems with electronic control. Due to the compact and modular construction the belts and other parts are quickly removable without any tools for cleaning.

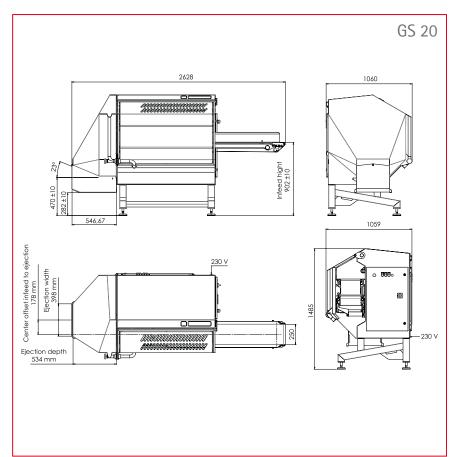

#### Support arm

This accessory is ideal for changing very heavy knife discs and to re-assemble them. The support arm can be easily attached to any GS 20. Another advantage is the simple storage behind the GS 20 without additional storage space.

# Technical drawings & specifications

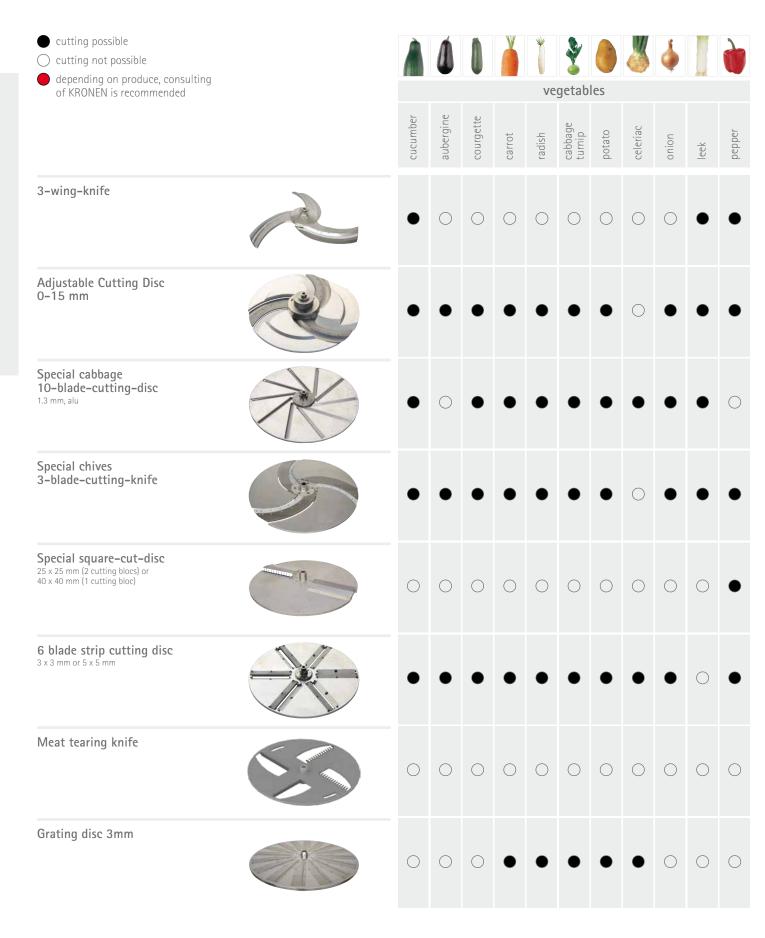

measures	
length	2628 mm
width	1060 mm
height	1485 mm
weight	530 kg
infeed / feeding height	905 mm
discharge / outfeed height	470 mm
helt width	250 mm
height of downholder	210 mm
conveyor speed	2,6-19 m/mir
knife rotation speed	130-590 r/mir 1-50 mm
theoretical cutting thickness	1-50 mm
power	
total power	3 kW
voltage	1~230 V N/PI
frequency	50/60 Hz

### Product Range:

- · Belt cutting machines GS 10-2, GS 20
- Slice and wedge cutters Tona S, Tona E, Tona S 180K
- · Special cutting and punching machines Tona Rapid, Tona Rapid 3D, Tona Rapid XL, Multicorer, TT 450
- Cube and strip cutter KUJ V
- · Spiral cutting machines SPIRELLO 150, S021
- Multi purpose cutting machine KSM 100
- Cabbage cutting machine CAP 68
- Cabbage corer KSB-2

- Dicing, wedging & shaping machine PGW, HGW
- · Vegetable and salad washing equipment
- **Peeling machines** for citrus fruit, melons, apples, pineapples, potatoes, carrots, turnips, beetroot, etc.
- · Spin dryers and de-watering systems
- · Vertical flow packaging machines
- · Special machines
- · Complete production lines

We develop and manufacture single and special machines as well as complete processing lines for the food processing industry. We successfully implement production processes for you by effectively combining single machines.

KRONEN - smart solutions and convincing technology for the food processing industry!
